Appl. No. 10/812,330 Amdt Dated July 25, 2006 Reply to Office Action of January 25, 2006

Docket No. CM02046KD01

## **Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

## **Listing of Claims:**

- 1. (currently amended) A multi-configuration portable electronic device, comprising:
- a first body element having electrical circuitry disposed therein;
- a second body element having electrical circuitry disposed therein;
- a hinge for allowing configuration <u>by movement</u> of the first and second body elements relative to each other into at least portrait, landscape, and closed positions, <u>the hinge comprised of a pair of identical asymmetric hinge body halves that interlock</u> and for routing a flexible circuit board between the first and second body elements <u>through an elbow portion of the hinge body halves</u> wherein upon movement of the first and second body elements the hinge prevents twisting of the flexible circuit board.
- 2. (original) A multi-configuration portable electronic device as defined by claim 1, further comprising a detent mechanism in the hinge for holding the first and second body elements in at least portrait, landscape, and closed positions.
- 3. (original) A multi-configuration portable electronic device as defined by claim 2 wherein the detent mechanism comprises a spring, a cam, and a cap having cam followers, all coaxially located, and wherein the cam is held in position with respect to one of the body elements of the multi-configuration portable electronic device, and the cap is help in position with respect to the hinge.

Docket No. CM02046KD01

4. (original) A multi-configuration portable electronic device as defined by claim 1 further comprising a hook member disposed each of the first and second body elements and each in correspondence with a collar portion of the other body element, wherein the hook member retains the collar portion upon rotation of one of the body elements about the hinge.
